Abstract

An abstract should be included in full papers, but not in extended abstracts. It should be no more than 200 words, with no citations or equations.

1 Introduction

Section headings are to be used only in full papers, not in extended abstracts. Page limit is 1 page for extended abstracts (including one mandatory figure), or 15 pages for full papers (including figures, tables and references).

2 Related Work

See the NERCCS formatting instructions [1] for more details. References should be included in full papers (but are not required for extended abstracts). References should be sorted in the order they appear in the text.

3 Methods

This example was typeset using TeXworks / MikTeX on Windows.

4 Results

One figure is required in extended abstracts. Multiple figures and tables are allowed in full papers. Color figures may be used. Figure 1 shows a sine wave plotted over the domain $[0, 10]$.

5 Conclusions

If you have any questions, email nerccs2025@gmail.com.

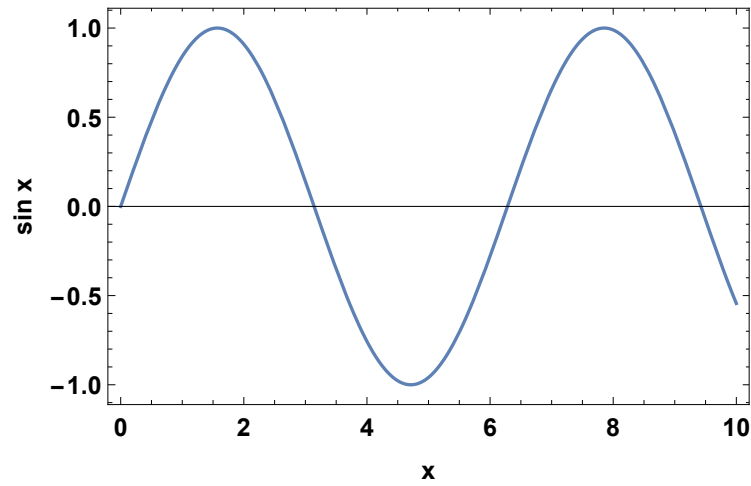

Figure 1: A sine wave plotted over $[0, 10]$.

Acknowledgments

Any acknowledgments, including funding information, should be described here.
